

Amendments to the Specification:

Please add an abstract as follows:

--An aerosol composition comprising a propellant and a first particulate material comprising particles having a median aerodynamic diameter with the range 0.05 to 11 μm , such as a medicament suitable for pulmonary inhalation, and a second particulate material comprising particles having a median volume diameter within the range 15 to 200 μm . The presence of the second particulate material provides good suspension properties, particularly where the propellant is a hydrofluoro alkane.--

Prior to the first paragraph of the specification, please insert the following:

--This application is a continuation of U.S. Application No. 09/647,331, filed January 30, 2001, which is the U.S. National phase filing of PCT/GB99/01019, which claims the benefit of GB 9807232.5. All applications above are incorporated by reference in their entirety herein.—

Amendments to the Claims:

Please cancel claims 1-35. Please add new claims 36-65 as shown on the attached Listing of Claims.
